Who tell lies ?

During the math lesson, a paper plane flies throught the classroom.

Four students are involved. The teacher wants to know who did it and asks each student:

- « It's not my fault » Bruce says.
- « It's Melinda » Oliver says.
- « It's Peter » Melinda says.
- « Oliver is wrong » Peter says.

Just ONE person doesn't tell the truth, could you find the guilty student ?

Good Luck !
